MWTP/BMWTP Placement Numbers

- Once a student is enrolled in your program, he or she must be counted.
- You can have a pre-enrollment (trial) period for a short period of time. This must be clearly defined and articulated to the student and NIEHS. After that time, the student must be counted.
- Why is this important? We must be using the same numbers.

In summary for smooth sailing....

- Target Training to Brownfields Showcase, SuperJTI sites, and other designated target populations.
- Use resources and contacts from local, state and federal agencies.
- Contact me and ask questions about any issues.
